Senior Consultant

Senior Consultant- Privacy and Information Security / Cloud Services

Privacy and Information Security Consultant with 20 years of experience in IT and Cybersecurity: 15 years of large, scale, Telecom and Enterprise IT experience with open systems (UNIX/Linux) and IP networking. Worked for Fortune 100 companies (HP, Cisco, AT&T Wireless) and International companies such as British Telecom/Tymnet. Also co-founded Captus Networks—an early pioneer in network security. His expertise is helping companies optimize their security portfolio to minimize cost and maximize risk reduction. He also is the chairman of the IEEE P7002 workgroup that is currently drafting a privacy process standard.

- Development of privacy and information strategy, security architecture roadmaps, gap analysis and remediation roadmaps
- 20 years of experience of IT and Cybersecurity aligning to the business / organizational priorities
- Developed Cloud templates for state government and highly regulated industries that align to NIST/FISMA/FEDRAMP standards
- Developed innovative platforms to conduct DR/BCP testing in virtual isolated zones within production environments.
